Nail technology requires skill and excellent preparation of the natural nail to achieve the best results. This course will give you confidence and a high standard of education to work in a salon or set up your own business.

What you will learn

- Structure of the nail, its growth and associated diseases of the hands and feet
- Hygiene and safety procedures
- Consultation and record cards
- Safe practise and contra-indications
- Preparing for your client
- Application of Acrylic, Fibreglass and Gel nail tip systems
- Equipment required to perform nail extensions
- After care advice

What to expect from the course

- A natural progression from the manicure/pedicure course allowing the student to apply the acrylic, fibreglass and gel nail tip system safely
- Students will be able to analyse a clients nails and advise their client on the pros and cons of wearing nail extensions
- After successful application of the nail tip, students will have practised the art of applying polish and be able to discuss confidently a suitable after care plan for their client
- Further courses available after successful completion of this course: Nail art
- Students will be required to work on each other or provide a model for practical sessions
