

MicroDermabrasion

Cost **£99** +VAT

Duration **1 day**

Pre Requisite – **Facial Electrical certificate**

This is an advanced electrical therapy treatment that removes loose cells from the Stratum Corneum, Stratum Spinosum and Stratum Granulosum.

The objective of the treatment is to encourage the skin (Dermis) to trigger its repair mechanism. This then produces a younger, fresh looking skin.

This is an excellent anti ageing treatment and increases the absorption of facial products by 63% according to dermatologists. This treatment will not only boost your facial therapy bookings but will also increase your product sales.

The Micro Derma brasion treatment is also recommended for extreme acne problems. Superficial scarring and uneven skin texture can be buffed out to smooth the surface of the skin. A powerful anti-aging skin treatment when applied as a course.

Day 1 am

Theory and Demonstration

The effectiveness of the treatment for the many different skin types will be taught. Machine care, operation and maintenance is an important part of the pre treatment and will be demonstrated during the morning theory session. Contra indications, record keeping and treatment planning. The tutor will demonstrate a full treatment routine.

Day 1 pm

Group Practical

The practical session will give you the opportunity to apply the Micro Derma brasion with the supervision of the tutor. You will work on each other so that you have a good understanding of the clients' experience. Pressure and diamond tip changes will be covered in the guidance of the workshop.

Things that you need to know about the course

You will cover both theory and practical of Micro dermabrasion. You must be prepared to experience the treatment or bring a model. This is not a qualification, it is a company certificate. It is an insurable certificate. You must wear salon uniform. Machines are available to purchase on the day with a '25% training discount'.
